
Glass Bead NTC Thermistor

Description

Type GB type

Features :

- Glass sealed radial lead type
- Fast response time
- High reliability and high moisture proof
- Wide range of operating temperature from -50°C up to 300°C

Applications:

- Low cost probe assemblies
- High temperature printer ink sensing
- Consumer electronics
- High temperature-high speed tire manufacturing
- Printed circuit board temperature sensing
- Air-conditioner
