
MF52A

Description

Product features:

- High measurement accuracy for precise temperature sensing
- Compact design with fast thermal response time
- Stable performance for long-term reliability
- Excellent interchangeability and consistent quality
- Cost-effective solution with large-scale production capabilities

Product application:

? Air conditioning equipment.

? Heating equipment.

? Electronic thermometer.

? Liquid level sensor.

? Vehicle electronics.

? Electronic desk calendar.

? Cell phone battery.
