
MF59 Glass Bulb NTC

Description

Product features:

- Glass-encapsulated design suitable for harsh environments, including high-temperature and high-humidity conditions
- High-accuracy temperature measurement with excellent stability and a wide resistance range
- Compact size with fast thermal response and high sensitivity for precise temperature detection
- Leadless design for easy SMT (Surface Mount Technology) automated installation

Product applications:

- Office automation equipment
- Digital devices
- rechargeable batteries, etc.
