
Point Matched NTC Thermistors

Description

Type PM Series

Features :

- Tolerance resistance matched to specific temperature
- Reduced cost for high volume applications
- Proprietary processes produce top of the line quality and stability
- $\pm 1\%$ to $\pm 10\%$ tolerances
- RoHS Compliance

PM Series thermistors are precision tested at a chosen tolerance to a specific temperature. This cost effective thermistor provides an advantage to industries with high volume applications, such as in HVAC, automotive, and industrial markets.
